# 6 GUARANTEED OSWEGO Stillson Wrenches

Packed in a Light Convenient Box

This set of six genuine Oswego Stillson Wrenches will handle efficiently all ordinary piping jobs. The wrenches are the Genuine Oswego construction, giving a larger bearing surface between the frame and jaw, a point where many other wrenches are weak.

## Oswego Vise Display Stand

### THE SILENT SALESMAN

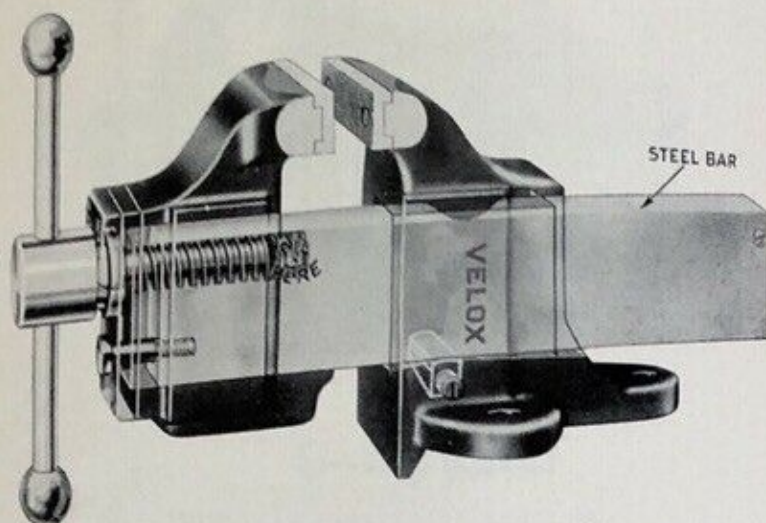

Loaned to our customers with an order of assorted vises amounting to \$150.00. Requires little floor space.

OSWEGO VISES are made in standard weights only. We do not manufacture under-weight vises. All parts are carefully machined and interchangeable.

OSWEGO VISES have been designed to most effectively resist the strains required for bending, chipping, riveting and filing.

The vise jaws are removable and are made from high grade tool steel and faced with cross corrugations of our own special design.

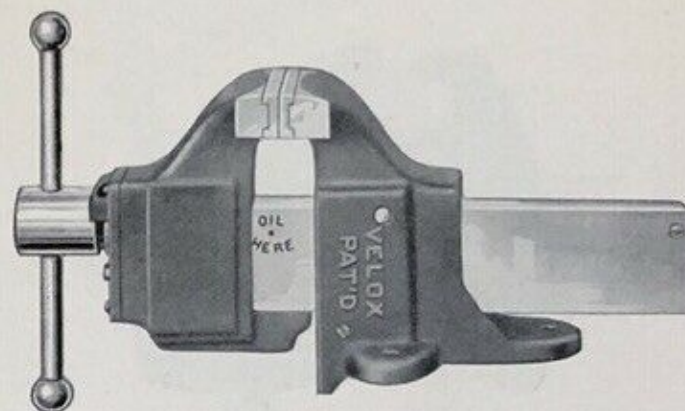

## VELOX VISE

THE VELOX VISE is the *first* quick action vise ever invented that would give all around satisfaction.

It will outwear any other style of vise made! It will stand heavier strains! It is adapted for every class of vise work. Nothing to get out of order.

This vise is fundamentally strong and trustworthy. The design is theoretically and practically sound. It is designed on the pinch-bar, instant-locking principle and it grips the work quicker than any vise ever before built.
